

# Asset Managers Increase Productivity while Managing your Pipeline.

- ✓ Automates service orders, tracking, and communications. End the back-and-forth voice mails, emails that wasted time, tracking, and managing notes.
- ✓ Dashboards can show you exactly where your trouble areas are with embedded business Intelligence, based on your pre-defined criteria, and arm you with the information you need.
- ✓ Managing Specialty Servicing of NPL's, with network wide digital connections to Legal Firms, REO, Construction Property Preservation and other specialty firms. With real time status and data updates from service providers.
- ✓ All communications are attached to each loan, supplying instant tracking and the ability to analyze data, even if the communications originate from multiple sources.
- ✓ Referral and Work Order tracking reflects all Federal, State and county requirements and the variations based on the property location automatically.
- ✓ Optional integrations can even automate risk assessment reports into online services like the FIMA databases. Dashboards gathers multiple data sources into a single interface. An organized detailed overview of your business in one quick glance.
- ✓ Customized User Roles allow direct access to your Loans and Work Orders. You can even give View Only Access to your Customers

## Ditch the Spreadsheets

NPL Manager® streamlines your Non-Performing Loan data and task management, allowing you to collaborate with your team and Service Providers in one place and in real time.

Manage 10 or 10,000 Non-Performing Loans, your data and processes are managed with ease. Automating and organizing your workflow process, everyone involved can see exactly what the status is and what needs to be done.

## Data Management Tools

Our innovative search, filtering, and sorting tools allow both the Asset Manager and their Service Providers to manage the Non-Performing Loan data all in one place.

- ✓ Notes/Loans
- ✓ Documents
- ✓ Work Orders
- ✓ Messages
- ✓ Timelines
- ✓ Activity Logs
